### 7.3. INSTITUTION DISTINCTIVENESS- 2022-23

#### Performance of institution in one area of distinctiveness

Most students admitted to our institution hail from humble economic background, necessarily inclusive to the vision and mission of the college. They face a major problem in English language fluency, that hinders their educational growth and job prospects. Thus, to empower the students and make them fluent in both spoken and written English, the institution has adopted and introduced English Language Lab. *The Wordsworth English Language System* and *Grammarwiz.com* which helps transform students by enhancing their listening, and communication skills.

The English language lab is a digital learning platform that allows students to practice their English language skills in a controlled environment providing state-of-the-art technology that makes language learning interactive, fun, and engaging. The lab provides a unique opportunity for students to practice their listening, speaking, and writing skills in an environment that simulates real-world situations. English language lab software that allows students to practice English vocabulary, grammar, and pronunciation

The two soft-wares used provide students interesting way of learning, a interactive, easy to use app, help students develop critical thinking, problem-solving, and communication skills. The use of technology in language education has also led to an increase in digital literacy, which is becoming increasingly important in today's world.
